## TECHNICAL SKILLS

---

JavaScript, TypeScript, SQL | Node.js, Fastify, Express.js, React.js, Next.js | Git, Docker, AWS

## EXPERIENCE

---

### Software Engineer

Jul 2025 – Present

*Financial Times*

*Sofia, Bulgaria*

- Modernised legacy frontend services, replacing fragmented implementation patterns with shared architecture, reusable modules and consistent engineering standards.
- Designed reusable event-driven architecture adopted across six products, spanning frontend services, serverless workers, persistence layers, validation flows, analytics instrumentation and content delivery.
- Led technical-debt initiatives across multi-tenant applications, applying deep-modules/thin-interfaces architecture to centralise domain logic and reduce related code by up to 70%.
- Owned platform capabilities from technical discovery through architecture, implementation, documentation and rollout guidance for adoption by multiple product teams.

### Software Engineer

Aug 2023 – Jun 2025

*Intermedia*

*Sofia, Bulgaria*

- Developed and maintained backend services and APIs for data-intensive platforms across diverse domains.
- Designed and optimised SQL database structures to support evolving application requirements and high-volume data workflows.
- Built responsive client-side applications using modern JavaScript frameworks, structured state management and reusable UI patterns.
- Collaborated across product and engineering teams to deliver maintainable features from specification through release.

### Business Representative

Apr 2022 – Jul 2023

*CluneTech*

*Sofia, Bulgaria*

- Managed client communication and resolved service-related issues across financial and operational workflows.
- Facilitated payment transactions totaling up to \$200,000 while maintaining accurate documentation and compliance standards.
- Worked with cross-functional teams to improve issue resolution, documentation accuracy and client experience.

## VOLUNTEERING

---

### Mentor

*Telerik Academy*

*Sofia, Bulgaria*

- Guided students in building real-life software applications from specifications, advising on architecture, technology choices and implementation quality.
- Shared practical engineering knowledge through code reviews, best-practice discussions and system design guidance.

## EDUCATION

---

### University of Ruse

*Bachelor's degree in Digital Management and Innovations*
